Projects

- **Certificate Authentication Detection using Blockchian**
  Certificate authenticity detection using blockchain leverages the technology's decentralized and immutable ledger to securely store and verify certificates. Each certificate is recorded as an unalterable transaction, ensuring it cannot be tampered with or forged. This system enhances transparency, as anyone can verify a certificate's authenticity on the blockchain. By using cryptographic security and smart contracts, the verification process becomes automated and trustworthy. This approach significantly reduces the risk of certificate fraud and bolsters the credibility of institutions.
